Brijesh Sangani

UI/UX Designer | Product Thinker

Building better user journeys, one pixel at a time

About Me

I'm a mid-level UI/UX Designer with 1.5 years of experience designing user-focused digital products for web and mobile platforms. I specialize in creating clean, functional, and visually balanced interfaces that enhance usability and align with business goals.

From initial research and wireframes to final UI and developer handoff, I'm involved in the full design process. I approach every project with a mix of creative thinking and problem-solving, aiming to deliver meaningful experiences that meet both user needs and product requirements.

Experience

- Feb-2024 to Present**
At Aimbrill technology

Projects

- Destinova AI ChatBot**
Shopify App – AI-powered customer support & sales assistant
Designed the complete user interface for an AI chatbot app built for Shopify merchants. The chatbot helps automate product recommendations, order tracking, and 24/7 customer support. Focused on creating a seamless onboarding flow, an intuitive live chat panel, and scalable UI for varied merchant needs.
destinovaailabs.com
- WeUpsell – AI-Generated Popups**
Website widget – Smart upselling and revenue growth tool
Led the full UI/UX design of an AI-based popup builder that helps e-commerce websites increase sales through automated, behavior-driven popups. Designed the flow for popup creation, targeting rules, analytics dashboard, and template customization. Balanced usability with visual appeal to support conversion-focused merchants.
weupsell.com
- Capsule Store**
E-commerce website – Product-focused, modern shopping experience
Designed the complete UI for an online store offering a curated selection of lifestyle and tech products. Focused on clean layout, product discoverability, and responsive design for smooth shopping on both desktop and mobile.
